

Candidate bacteriocin loci in the S1A draft genome

Gene roles are automated predictions from annotation product names and have NOT been manually curated.

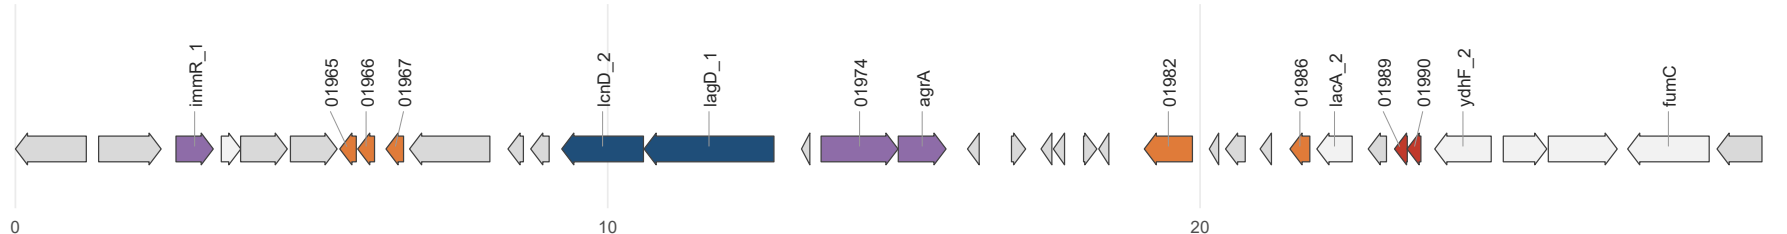

BGC_03 — S1A_contig_001 : 190,332–202,801 (medium confidence)

BGC_05 — S1A_contig_001 : 470,813–481,068 (medium confidence)

BGC_08 — S1A_contig_008 : 20,753– 49,005 (high confidence)

precursor peptide immunity transport / export regulation hypothetical protein other function

Arrows point in the direction of transcription. Genes are drawn to scale; the kb axis restarts at each locus.
